

## **Examination questions: Safety for Intermediaries and Supervisors**

### **Event code: Proefexamen\_Engels VII**

Please read the following instructions carefully!

This examination is comprised of **70** multiple-choice questions.

Each question is followed by three possible answers, of which only one is correct.

A maximum of **70** marks can be scored in this examination. Every correct answer scores 1 mark.

You will have passed when you score at least **49** marks.

The maximum time for this examination is **105** minutes.

#### Requirements:

- these examination questions
- the answer sheet (used to note your answers)
- a pencil and eraser

#### Directions:

- make sure that you have all the pages in these examination questions
- only use a pencil to enter your answers on the answer sheet
- note your answers under the corresponding question numbers on the answer sheet
- indicate your answer by using your pencil to blacken the appropriate square
- always thoroughly erase any incorrectly entered answer

A multiple-choice question will be regarded as incorrectly answered when:

- the wrong answer has been chosen
- more than one square has been blackened
- no square has been blackened
- a square has not been blackened, but has been marked in some other way

At the end of the examination:

- write or check your name on the answer sheet
- give the supervisor these examination questions and the answer sheet

In the event of any differences in interpretation the original Dutch version of this examination is binding.

1 What is the general purpose of the health and safety legislation?

- A Guaranteeing the safety of companies and the well-being of the employees in the performance of their work.
- B The payment of compensation to employees whose welfare is harmed by work because of accidents or illnesses.
- C Improve the well-being of employees during their work.

2 Some employees in a company are refusing to wear personal protective equipment. What can the Labour Inspectorate do in this case?

- A The Labour Inspectorate may give a warning.
- B The Labour Inspectorate can require the employees to take an obligatory course.
- C The Labour Inspectorate can draw up an official report and stop the work.

3 Who is legally responsible for the application of the "Well-being" Act at the company?

- A The employer.
- B The prevention service.
- C The Health and Safety Inspectorate.

4 A claw hammer falls off a scaffold under construction, and hits the head of a passer-by. The passer-by suffers from a resultant head injury. Which of the following statements is then correct?

- A The company carrying out the work is liable, passers-by should also be protected.
- B The passer-by is liable, since the passer-by should have realized that it is dangerous to walk past a scaffold whilst it is under construction.
- C The liability lies with the party that made the mistake, in this instance the person who dropped the hammer.

5 Do temporary employees and the company's own employees have the same rights and obligations with respect to welfare legislation?

- A Approximately, separate obligations apply to both but in practice they are very similar.
- B Yes, the welfare legislation does not distinguish between them.
- C No, the company's own employee has better protection, which is why the employment agency makes special extra provisions for temporary employees.

6 What are accidents often caused by?

- A Human error.
- B A faulty machine.
- C An unexpected event.

7 What is a Task Risk Analysis (TRA)?

- A A written evaluation of the tasks described in the Risk Analysis (RA).
- B A written summary of tasks that can cause risks in a company.
- C A written analysis of risks that can occur while performing risky tasks.

8 What does accident prevention mean?

- A Avoiding unsafe actions and situations.
- B Having a good company emergency team.
- C Having an occupational health and safety manual.

9 What does the annual action plan mainly consist of?

- A Objectives, measures and resources for the next year and any changes to the prevention plan.
- B The programming and objectives of the safety training and courses for the next year.
- C The analysis of accidents and incidents over the past year and corrective actions.

10 How does the informing of an employee about the risks and management measures preferably take place?

- A Through an information booklet.
- B Through a personal safety pass.
- C Through toolbox meetings.

11 What is a way to tackle unsafe situations and dangerous actions?

- A Personal protection.
- B Work more quickly.
- C Screens and protective appliances.

12 What can cause an employee to make a human error?

- A The employee is working shifts.
- B The employee has domestic problems.
- C The employee is attending a course.

13 Which preventive measure has an effect on the "environment"?

- A Ensuring good climatic conditions.
- B Giving safety training.
- C Choosing machines with a safe technical design.

**14** What is the purpose of the work accident investigation?

- A Improve the efficiency of the company.
- B Provide the insurance company with the necessary accident details.
- C To deal with unsafe actions and unsafe situations.

**15** When is it preferable to work standing up instead of sitting down?

- A If employees often have to reach down, reach up or stretch away from their body.
- B If an employee prefers to stand, then he/she may do so.
- C If there is no space for a chair.

**16** Which negative effects can the use of alcohol or drugs have on safety at work?

- A Bad behaviour towards colleagues.
- B Concentration is reduced and less care is taken.
- C High rate of absenteeism.

**17** What basic measure should be taken to avoid danger when walking?

- A The workplace should be kept neat and tidy.
- B Employees should be trained to watch out where they are going.
- C There should be proper fencing off.

**18** What is a good behaviour rule for working safely?

- A Employees do not report the unsafe situation and wait until an accident happens before complaining about the situation.
- B Employees report unsafe situations and wait for the management to react.
- C Employees take immediate action in unsafe situations.

**19** A temporary employee suffers a workplace accident. Who should conduct the accident investigation?

- A The temporary employer and the temporary employment agency together.
- B The temporary employer.
- C The temporary employment agency.

**20** How can you improve the safety mentality of your employees?

- A By giving work instructions in writing.
- B By gaining insight into their capacities.
- C By hanging up the mission statement in the canteen.

**21** Which obligation is NOT legally imposed on you as employee?

- A Correctly use work equipment and protective equipment.
- B To take care for your own safety and that of your colleagues.
- C Stop machines and installations that may be dangerous.

**22** Which companies must carry out a risk assessment?

- A All companies.
- B Only companies with a VCA safety certificate.
- C Only companies with more than 10 employees.

**23** What purpose do the consultative bodies such as the trade union delegation and the committee have?

- A Punitive competence.
- B Advisory competence.
- C Power of decision.

**24** What is an important health and safety consideration when assigning a temporary employee?

- A Verification of the temporary employee's personal data.
- B Information about the physical characteristics of the temporary employee.
- C The procedure to be followed after a serious industrial accident.

**25** What is the meaning of the abbreviation VCA (SCC)?

- A Veiligheid-, gezondheid- en milieu- Checklist Aannemers (Safety, health and environment check list for contractors).
- B Veiligheid-, gezondheid- en milieu- Certificaat Aannemers (Safety, health and environment certificate for contractors).
- C VeiligheidsChecklist Aannemers(Safety check list for contractors).

**26** For what are specific safety rules required?

- A Activities with increased risk.
- B Activities performed by external parties.
- C All activities.

**27** In which situation would you use a blind flange?

- A To prevent internal contamination when transporting new pipes.
- B To shut off the supply lines when working in a confined space.
- C When checking the contents of a tank via a sampling point.

**28** What is one of the aims of a work permit?

- A To make binding work agreements.
- B To set up safety procedures.
- C To integrate newcomers to the Netherlands.

**29** What shape is a warning sign?

- A Round.
- B Triangular.
- C Square.

**30** What must the employment agency emphasize when instructing temporary employees?

- A To be aware of the safety of others during the work.
- B Keep the employment agency informed of the progress of the job.
- C The necessity and the correct use of personal protective equipment (PPE).

**31** When does a work permit come into effect?

- A When everyone has been instructed about the safety measures.
- B When it has been signed for approval.
- C When all the prescribed measures have been taken.

**32** What is the purpose of an evacuation exercise?

- A To see how fast the external emergency services will be there.
- B To prepare personnel for emergency situations.
- C To test the evacuation signal.

**33** What is obligatory in a company with respect to (emergency) assistance?

- A In a company with 50 or more employees the assistance must be organised.
- B The assistance must be organised and guaranteed.
- C The assistance must be organised by the Fire Department.

**34** What is the normal percentage of oxygen in the air?

- A 78%.
- B 51%.
- C 21%.

**35** What is the maximum period of exposure for a threshold value (MAC TWA) of 8 hours?

- A 24 hours a day.
- B 40 hours a week.
- C 32 hours a week.

**36** R phrases are mentioned on the label of a dangerous product. What do these indicate?

- A The risks of the product.
- B The safety instructions.
- C The smell limit of the product.

**37** What should you do if a leak happens?

- A Immediately alert the designated person and cordon off the workplace.
- B Immediately try to seal the leak yourself and cordon off the workplace.
- C Cordon off the workplace and fetch tools to seal the leak.

**38** What effects can hazardous substances have on our body?

- A Various health complaints that always occur shortly after contact with the dangerous substance.
- B This always involves serious consequences such as balance problems, heart palpitations and even cancer.
- C Headache, dizziness, queasiness, even effects on our future children.

**39** The white section of a hazard diamond is empty. What does this mean?

- A That, in case of calamities, this substance does not require special treatment.
- B That the product is radioactive.
- C That the product is not dangerous to your health.

**40** What should you do when you encounter "suspected asbestos" at the workplace?

- A You must contract a specialized company to remove the material.
- B You must have an independent laboratory establish whether the suspected material is in fact asbestos.
- C You must immediately invite the arbeidsinspectie (Labour Inspectorate) to come and carry out an inspection.

**41** What is the most suitable extinguishing method for a "metal fire"?

- A Extinguishing with foam.
- B Extinguishing with carbon dioxide.
- C Extinguishing with special powders.

**42** When attempting to extinguish a fire you must first ensure your own safety. What is the next thing to do?

- A Select the correct extinguishing agent.
- B Warn people in the direct vicinity.
- C Report that you are going to fight the fire.

**43** Which answer is correct for an area with an explosion risk?

- A You must take special precautions to prevent the ignition of explosive mixtures.
- B A work authorisation is not needed. Verbal instructions from your manager are sufficient.
- C The upper and lower explosion limits are close together.

**44** Some products can intensify a fire or in fact retard it. What is this phenomenon called?

- A Explosion.
- B Spontaneous combustion.
- C Catalysis.

**45** How does water extinguish a fire?

- A It increases the oxygen concentration.
- B It cools.
- C It stops oxygen reaching the fire.

**46** What aspects must be considered in the evaluation of the temporary work with the temporary employee?

- A Opportunity to work overtime.
- B Communication with management.
- C Motivation of the temporary employee to carry out additional tasks.

**47** Which of the following is a requirement when working with a stationary grinding machine?

- A The protective screen must always be used during grinding.
- B The guard must cover most of the grinding stone.
- C The distance between the circumference of the grinding stone and the guard must be at least 6 mm.

**48** Which is the correct way of working with an abrasive cutting wheel?

- A Remove the protective cover to see the workpiece better.
- B Keep the workpiece steady using your hands.
- C You only put the machine down when the grinding wheel has stopped.

**49** What do we mean by "hoisting tools"?

- A Tools used to assemble the crane.
- B Changeable accessory parts that are used during hoisting.
- C The different parts of the crane.

**50** In which situation is a hoisting yoke usually used?

- A For very voluminous loads.
- B For very heavy loads.
- C If there is little room above the load.

**51** In which situation is a tackle usually used?

- A If a large quantity of light loads must be hoisted.
- B If there are sufficiently strong persons present.
- C If use of a crane is impossible.

**52** What is a forklift truck?

- A A vehicle suitable for moving and lifting heavy loads using forks.
- B A vehicle suitable for moving loads and persons using forks.
- C A vehicle with forks used when there is too little room above the load.

53

Which measure you must take when welding?

- A A fire extinguisher at hand.
- B Remove other employees from the working space.
- C General forced ventilation.

54

What specific measure do you take when removing asbestos?

- A Wear safety shoes.
- B Wear an overall.
- C Wear a disposable overall.

55

What is the best safeguard to use for an opening in the floor?

- A Sufficient warning signs should be placed around the floor opening.
- B The floor opening should be covered with a strong material.
- C The floor opening should be well lit.

56

Working with gas cylinders in an excavation can be particularly hazardous. What safety measure do you take?

- A Never place gas cylinders in the excavation.
- B Never work with gas in or near an excavation.
- C Only place gas cylinders against the wall of the excavation.

57

Which is the correct way of working with a suspended scaffold?

- A If there are two or more of you in the suspended scaffold you do not have to wear your safety harness.
- B With a fault in the suspended scaffold you must remain calmly seated.
- C You enclose the area below the suspended scaffold with tape or with barriers.

58

How do you protect your health when working in a confined space?

- A By ensuring there is enough ventilation and fresh air.
- B By ensuring the temperature in the space does not fall below 21°C.
- C By keeping in touch with the safety officer.

**59** How should a temporary employee be involved in the toolbox meeting?

- A The employment agency must inform the temporary employee about the purpose and the existence of the employer's toolbox meeting.
- B This is the task of the employer. The employment agency has no role in this.
- C Toolbox meetings are for permanent personnel, a temporary employee does not have to be involved.

**60** How can an electric current cause a fire or an explosion in a space where there is a risk of fire or explosion?

- A Through the discharge of static electricity that accumulates around the electric cables and conductors.
- B Through the discharge of a magnetic field that arises around an electric motor.
- C Through the overheating of components in electrical installations e.g. poor contacts or overloaded lines.

**61** Why are electrical circuits insulated?

- A To keep weak-current and low-voltage components strictly separate.
- B To prevent the release of heat from cables.
- C To make live parts inaccessible.

**62** What is a general rule for working with electrical material?

- A Immediately replace damaged leads, cables, socket outlets.
- B Always wear insulating gloves.
- C Only use a low safety voltage.

**63** How one can protect oneself against ionising radiation?

- A By taking a shower immediately after the activities.
- B By wearing suitable PPE.
- C By wearing a dosimeter.

**64** What is the most important risk, when lifting a load manually with a bad posture?

- A Likelihood of cramp in the fingers.
- B Likelihood of straining the arms and wrists.
- C Likelihood of back injuries.

**65** Which factor influences the climate at the workplace?

- A Air humidity.
- B Physical exertion.
- C Personal protection equipment.

**66** What is an example of a dynamic load?

- A Forcefully holding in a button.
- B Manually moving material.
- C Drilling holes in the ceiling.

**67** When must you wear personal protective equipment?

- A When the company has a VCA certificate or is trying to get one.
- B When you can't remove, isolate or screen off hazards at the source.
- C When the client wants you to or you as the employee want to.

**68** What is the maximum protection offered by special cotton-wool ear plugs?

- A 45 dB(A).
- B 30 dB(A).
- C 10 dB(A).

**69** When must a safety helmet be replaced?

- A After a period which is given in the instruction manual.
- B When the sticker on the helmet with the employer's name is no longer legible.
- C If the date imprinted in the helmet has passed.

**70** What should you do if you use protective clothing?

- A Clean dirty clothing immediately or put on clean clothing.
- B After work, return the clothing to the supply room.
- C After work, clean the clothing with compressed air.
